

Introducing Microdermabrasion Plus

Australian Skin Cancer Clinics care about your skin and are introducing Microdermabrasion and Sonophoresis.

Microdermabrasion is a non-surgical, safe and gentle procedure that deeply exfoliates and polishes the skin to stimulate new cell growth.

How does it work?

- ✓ Combining a gentle vacuum system and diamond tips, **Microdermabrasion** removes dead skin cells and unclogs pores, to reveal a fresher complexion.
- ✓ It is a non-invasive, pain free procedure which can be used to treat a number of skincare concerns and requires no down time. Normal activities can be resumed immediately afterwards.
- ✓ **Microdermabrasion** can be used as a standalone treatment or as an addition to other facial treatments.

Sonophoresis is a safe, gentle treatment that uses ultrasonic technology, warmth and motion energy to significantly increase the depth and absorption rate of active ingredients into the deeper layers of the skin. It has been shown to increase the penetration and absorption of active ingredients by up to 80%.

How does it work?

- ✓ The skin's natural waterproofing barrier can often impede the absorption of active ingredients. The oil/water bi-layers in the stratum corneum act as a defence barrier that serve to protect the lower layers of the dermis.
- ✓ Sonophoresis works by using ultrasonic technology to relax this natural barrier by opening up the intracellular pathways to allow the active ingredients to be absorbed.

What to expect?

- ✓ The treatment is performed in a dedicated consult room by our trained staff member.
- ✓ No need to undress, however please refrain from wearing high necked tops.
- ✓ The process starts with a 3 step cleanse, followed by the microdermabrasion which perfectly prepares the skins surface for the enhanced infusion of treatment products applied during sonophoresis.
- ✓ We use ASAP cleansers, serums and moisturisers/sunscreen (ASAP is Australian made and owned) Treatment time - Allow 1 hr

Microdermabrasion is best delivered in a course of 6 -10 treatments, depending on the condition and type of skin being treated and the desired result. Although you notice the difference after one microdermabrasion treatment the true therapeutic benefit for acne clearance and anti-aging skin care is achieved with a course of treatments.
